

# CharityTracker™

## A Simple, Elegant Approach to Shared Case Management

Rappahannock United Way created a Charity Tracker Network for the Greater Fredericksburg area to create a more streamlined approach to providing assistance to individuals in need in our community.

**We want your organization to be a part of our network!**

## CharityTracker™

Charity Tracker is a web-based system that allows local health and human service agencies to share and track client data with multiple organizations within our community.

### Sharing

Every person who requests assistance is recorded in Charity Tracker as a case. Charity Tracker allows each member agency to share assistance records, notes, alerts, household relationships as well as history of case modifications with all member organizations.

### Safe & Secure

All accounts include SSL security, the same as online banks. Your data is backed up daily and monitored. Only verified members and registered agents can log in and access client data.

### Reporting

All the information entered into Charity Tracker can be used to filter and generate reports. Statistical reporting gives every member agency a complete perspective of clients we serve in our community.

**Join Now!** Charity Tracker allows for organizations to reduce and eliminate duplicate services and work collaboratively by sharing information and resources to help those who need it the most.

**FREE MEMBERSHIP FEES FOR A YEAR!** Rappahannock United Way has received a generous grant from the Mary Washington Hospital Foundation covering all membership fees to Charity Tracker for one year. Network membership is subject to approval.
